

```
ctream::collectors  
::Collector< T, std  
::stringstream, std::  
string >
```

A diagram illustrating inheritance. A blue arrow points upwards from a grey box to a white box. The grey box contains the text 'ctream::collectors ::Concat< T >'. The white box contains the text 'ctream::collectors ::Collector< T, std ::stringstream, std:: string >'. This indicates that 'Collector' inherits from 'Concat'.

```
ctream::collectors  
::Concat< T >
```
